

Midterm/Final Project: Vacation Itinerary

The purpose of this project is to work with a partner (or two) to practice making a detailed vacation travel itinerary for a customer in your imagined travel agency. You must consider transportation, sightseeing, accommodations, time, etc.

- The itinerary is for one week
- The starting and ending points must be the same airport
- The customer must visit at least two different cities

NOTE: Don't worry about expense. Imagine your customer has unlimited resources. Keep your customer in mind when you are planning.

The project has two parts. The first is due **Monday, April 23**. The second is due **Wednesday, May 2**.

Part I: General Travel Plans

- Due/present Monday, April 23: write down and tell the class the following information
- Description of your customer: who would take your vacation?
- Air travel: include airlines, flight numbers, and arrival/departure dates and times (including the time zones)
- Other transportation: buses, rental cars, subways, etc. (You can add more in Part II if necessary)

Part II: Daily Schedule

- Due/present Wednesday, May 2: include the following information on paper AND in a video, presentation, or play
- Accommodations: names of hotels, check-in and check-out times, and available facilities
- Morning, afternoon, and evening activities, including interesting places/attractions
- Restaurants, cafes, bars, etc. for breakfast, lunch, and dinner, plus drinks and/or snacks.

Use the example on the next two pages to help you.
